

ASSIGNMENT 2 PART 3 - TEAM PROPOSAL PRESENTATION:

Group name: Team 56

NOTES

CRITERIAS:

1. Technology Technology/ topic selection
2. Critically review the opportunities for society presented by the technology / topic
3. Provide a critical assessment of the risks posed by the technology / topic
4. Provide a critical assessment of the choices available when adopting the technology / topic

TOPIC OF CHOICE:

- To describe this we must clearly elaborate on the topic and its importance and the focus areas of the topic that is the sub topic
- What is our topic?
- Why is it interesting and important?

Defining the topic includes:

- **Country (topic):**
- **Province (sub topic):**
- **City(focus in sub topic):**

DEFINE AND JUSTIFY SELECTED TOPIC:

SYNTHESISE (bringing together different sources to develop arguments, NOTE: reference the sources):

Use a lot of synthesis and critique of the relevant literature and sources strongly supporting arguments made

- Context(could be about the conditions / factors for why the topic exists)
- Opportunity(could be advantages, how it benefits society)
- Risks/ challenges
- Choices(ethical considerations)

2. digital media-music AI voice changing

3. digital media -Cyber Security-Privacy

4 computers in education and learning- online learning

Importance of online education in Universities

OUR TOPIC:

The learning world has been changing since the past decade, 10 years ago learning was confined to physical classrooms. We relied on paper-based resources and attending class was the norm, taking notes from the lecturer was the primary resource for studying. But in today's world we have computers for online classes, online resources, and study guides.

WHY IS IT INTERESTING AND IMPORTANT?

In today's world, online learning has emerged, changing the way we acquire knowledge and skills. This explores the importance of online learning in our modern world. From its accessibility to its adaptability, we will look into the reasons why online learning has become an essential part of contemporary education in universities.

ROLES AND RESPONSIBILITIES

The Importance of Online Learning for Students

"By definition and through practice, distance education has become synonymous with innovative models of program delivery that offer more generous open and flexible learning opportunities to wider and more diverse audiences than did traditional classrooms. (Anderson, 2011, p. 76)

"Online learning, as a subset of all distance education, has always been concerned with provision of access to educational experience that is, at the least, more flexible in time and in space than campus-based education. " (Anderson, 2011, p. 53)

The Roles of Online Learning

"The famous quote from Oracle Corporation, "The Net changes everything," applies directly to the formal provision of education. Institutions that formerly relied on students gathering in campus-based classrooms are suddenly able to offer their programming on the Internet." (Anderson, 2011, p. 3)

"Online learning materials should include activities for the different styles, so that learners can select appropriate activities based on their preferred learning style. " (Anderson, 2011, p. 27)

Experience and Student-Centered Learning

"Online learning will enhance the critical function of interaction in education, in multiple formats and styles, among all the participants." (Anderson, 2011, p. 68)

Book Title: The Theory and Practice of Online Learning

Online learning for students-

“Between the uncompromised quality and the ease and flexibility inherent to being able to access the “classroom” from anywhere with a stable Internet connection, students are increasingly turning to online education by choice rather than necessity.” (Globokar & Lynn, 2010)

“Many students enroll in online classes due to necessity rather than choice. They may live in a rural area and therefore have difficulty accessing a brick-and-mortar campus, or may have to undergo medical treatments that preclude their ability to travel to campus to attend class at a set time each week.” (Globokar & Lynn, 2010)

The roles of online learning:

“The content of the online curriculum is often quite comparable to that found in face-to-face classrooms in terms of assignments and material covered, but the online platform facilitates a broader array of delivery styles and a greater level of interaction among students.” (Globokar & Lynn, 2010)

“The content of the online curriculum is often quite comparable to that found in face-to-face classrooms in terms of assignments and material covered, but the online platform facilitates a broader array of delivery styles and a greater level of interaction among students.” (Globokar & Lynn, 2010)

Efficiency for students-

“Because of the flexibility of online education, students may take for granted that their online coursework can easily fit into their typical schedule.” (Globokar & Lynn, 2010)

“Aside from commuting time, online students have reported that they actually dedicate more time to online courses each week than traditional courses.” (Globokar & Lynn, 2010)

Draft contents for presentation slides:

Online learning provides students with the opportunity to choose education as a preference rather than a necessity. With high-quality content and the flexibility to access the virtual classroom from anywhere with an internet connection, many students are opting for online education to meet their educational goals. However, it's essential to recognize that some students have no choice but to enroll in online classes due to specific circumstances. This includes students who reside in rural areas with limited access to physical campuses or those undergoing medical treatments that restrict their ability to travel to campus for scheduled classes.

Online learning plays a significant role in education by offering content that is on par with traditional face-to-face classrooms in terms of assignments and material. However, it stands out by providing diverse delivery styles and enhancing student interaction, creating a dynamic learning environment.

Online education is valued for its flexibility, allowing students to seamlessly integrate their coursework into their daily schedules. This adaptability provides convenience and allows students to balance their educational pursuits with other life commitments. Interestingly, online students often invest more time in their online courses compared to traditional ones, primarily because they can dedicate this time more efficiently. Without the need for commuting, they can focus on their coursework, resulting in an efficient use of their time.

FINAL PRESENTATION SLIDE part 4:

ENHANCING ONLINE LEARNING THROUGH ADAPTABILITY

"Online learning materials should include activities for the different styles, so that learners can select appropriate activities based on their preferred learning style." (Anderson, 2011, p. 27)

Personalized Learning Experiences

In online education, adaptability is a cornerstone.

Learning materials offer a spectrum of activities to cater to varying learning styles.

Learners have the freedom to choose activities that resonate with their preferred style.

Fostering Engagement

Adaptability enhances engagement and participation.

When learners can select activities that align with their learning style, they become more engaged in the learning process.

Engaged learners are more likely to retain and apply knowledge effectively.

FLEXIBILITY AND EFFICIENCY IN ONLINE EDUCATION

"Because of the flexibility of online education, students may take for granted that their online coursework can easily fit into their typical schedule." (Globokar & Lynn, 2010)

- Flexibility as a Key Feature:
- Online education offers flexibility, allowing students to learn at their own pace.
- Students often find it convenient to integrate online coursework into their daily routines.
- This flexibility enhances accessibility and engagement in learning.
- Efficiency of Online Learning:
- Efficient time management is a hallmark of online education.
- Students save time on commuting and can dedicate more time to coursework.
- This efficient use of time benefits both students and educators.

INNOVATIVE ASSESSMENT METHODS IN ONLINE EDUCATION

"Innovative assessment methods are becoming more prevalent in online education due to the challenges of arranging group exercises for distant students." (Jones, 2022)

- Challenges in Group Exercises:
- In traditional education, group exercises are common for collaboration and skill development.
- Online education faces challenges in arranging group exercises for geographically distant students.

- Promoting Collaboration:
- Innovative assessments not only address challenges but also promote collaboration.
- They encourage students to work together in virtual environments, simulating real-world teamwork.
- This approach prepares students for the demands of the modern workforce.
